

STYLE GUIDE

JAVASCRIPT

Indentation: tabs (no spaces) are equivalent to four spaces

```
else if (password.length < minPassLen) {  
    ...  
}
```

Variables & Functions: are all camelcase

```
var multiWord;  
function someRادمethod() {  
    ...  
}
```

Brackets: braces on the same line and one space away from parenthesis

```
else if (password.length < minPassLen) {  
    ...  
}
```

Comments: comments before every function

```
/*  
 * [description of function]  
 * @param {TYPE} parameter1 [description]  
 * @param {TYPE} parameter2 [description]  
 * @return {TYPE} [description]  
 */  
function someFunction(parameter1, parameter2) {  
    ...  
}
```

Spacing: spaces only between commas

```
int i;  
for (i=0; i<10; ++i) {  
    printf("%d", i*i+i);  
}
```

Other:

- No vertical alignment
- Max line length is 200 characters

HTML

Class & ID Naming:

```
<h1 class="big-text-header" id="green-text">Title text</h1>
```
